Video standards convertor TCMD 850

Convert signals between:

- PAL <-> NTSC
- PAL <-> SECAM
- NTSC <-> PAL
- NTSC <-> SECAM
- SECAM <-> PAL
- SECAM <-> NTSC
- PAL M <-> NTSC
- PAL N <-> NTSC

Incredible
Value

*

Video standard selectable between:

- * NTSC 3.58 or 4.43 (USA, Canada, Mexico and Japan)
- * PAL (For PAL B/G, D/K, I - Secam D/K, B/G, K1 Countries)
- * Pal M or Pal N (for Argentina, Brazil and other parts of South America)
- * SECAM (For France Secam L)

Superb conversion characteristics.

- * Fully digital decoding and encoding
- * Fast 12 Megabits video field memory
- * The latest digital signal processing circuitry along with 12 MBit memory eliminates artifacts in the converted image
- * Memory speed 50 Mhz
- * Static resolution: up to 500 lines
- * Dynamic resolution: up to 500 Lines
- * 4 Field conversion of NTSC signals
- * 8 Field conversion of PAL signals
- * Video automatic gain control .

Incredible image quality

- * Digital Line (525 <-> 625 Lines) and 50<->60 field conversions
- * Built-in Time Base Correction for signal synchronization

- * 19" rack 1U, depth 310mm
weight 3kg

- * Power supply. 100-26 50/60 Hz switch mode supply.
